

*ABSTRACT AMENDMENTS*

Replace the Abstract with:

A power hand tool ~~comprises~~ includes a body and an electric motor in the body and having a shaft for driving a connector for connecting and driving a ~~clean~~ cleaning/polishing implement. An enclosure encloses the motor for protection against intrusion of a liquid, ~~which and~~ includes a thermally conductive end cap that is exposed ~~to the exterior~~ outside of the body. A thermal conductor in contact with a metal casing of the motor and the end cap conducts heat from the motor to the end cap for heat dissipation.
